TECHNICAL SKILLS

JavaScript | TypeScript | React | Node.js | Express.js | MongoDB | Flutter | Firebase | REST APIs | Git/GitHub | JWT Auth

SOFT SKILLS

Communication

Problem Solving

AI-Assisted Development & Prompting

Self-Directed Learning

Adaptability

LANGUAGES

English — Fluent

French — Professional Working Proficiency

ACTIVITIES

NAHPI Hackathon — Presented TalentBridge CM, an AI-powered job-matching platform

PROFESSIONAL PROFILE

Software engineering student from Cameroon with hands-on experience building full-stack web and mobile applications using the MERN stack and Flutter. Comfortable working across the development lifecycle, from database design and authentication to deployment, and skilled at integrating AI tools into a disciplined development workflow rather than relying on them blindly. Motivated to pursue graduate study abroad to deepen expertise in cybersecurity and AI-driven automation, with the long-term goal of building technology that creates opportunity across Africa.

EDUCATION

B.Sc. in Software Engineering / Computer Science — In Progress
University of Bamenda

PROFESSIONAL EXPERIENCE

Software Developer Intern — 2 Months

- Worked through practical software development tasks, strengthening core programming, debugging, and problem-solving ability.
- Applied and refined a professional development workflow, including version control with Git/GitHub and structured task execution.
- Built working familiarity with real-world development practices beyond academic coursework.

PROJECTS

TalentBridge CM — Bilingual AI-Powered Job-Matching Platform

- Designed a weighted skill-matching algorithm (Skills 50%, Experience 25%, Education 15%, Language 10%) to score candidate-job fit.
- Authored a Software Requirements Specification (v1.1) covering the matching logic and scalability planning.
- Planned bilingual (English/French) support, Orange Money payment integration, and an AI-assisted CV builder.
- Presented the platform at the NAHPI Hackathon.

React · Node.js · Express.js · MongoDB · AI Integration

Livra — Logistics Tracking SaaS

- Built a two-role logistics platform with an admin dashboard and a public shipment-tracking page.
- Implemented barcode generation, automated PDF invoicing, geocoding, and interactive map tracking.
- Integrated an AI-powered customer chat assistant on the public tracking page using the Anthropic API.

React · Node.js · Express.js · MongoDB Atlas · Leaflet.js
